REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The applicants amended the claims to clarify the method of the invention. The claims as amended meet the requirements of 35 USC 112. The rejection made in the previous Office action is withdrawn.

After consideration of the amended claims, reconsideration of the previously cited prior and consideration of the newly discovered prior art the examiner takes the position that the pending claims are allowable.

The following documents are cited to show the state of the prior art with respect to reaction chambers and the cleaning of the chambers: US patents 4,960,488, 6,183,563, 5,607,218, 5,338,363, 6,217,658, 6,26,185, 5,522,934. US Patent No 6,579,372 issued to the inventor of the instant application is made of the record.

The examiner's position is that none of the cited documents taken alone or in combination with other documents teaches or fairly suggest the claimed method.

US Patent No 5,926,743 is considered to be the closest prior art.

This document teaches a concept of preventing the lower part of the apparatus from over etching during a cleaning process by introducing inert gas during the cleaning process through the lower purging system. However, the document fails to teach or suggest flowing inert gas as it required by the instant claims.

It is further noted that while some of the cited documents teach nozzles similar to the ones used by the method of the invention, none of the documents teaches flowing an inert gas through these nozzles during cleaning.
